**ULTIMO II**®

## Matboard Storage Cart

7539

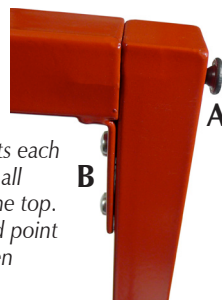

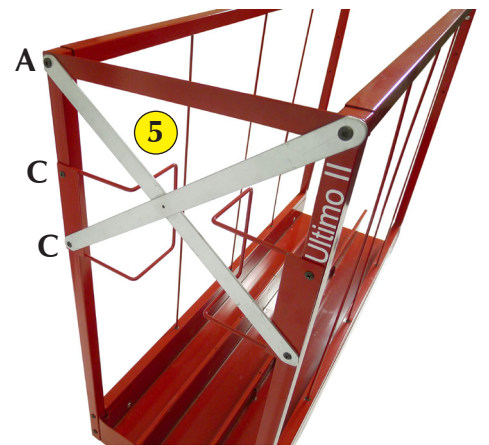

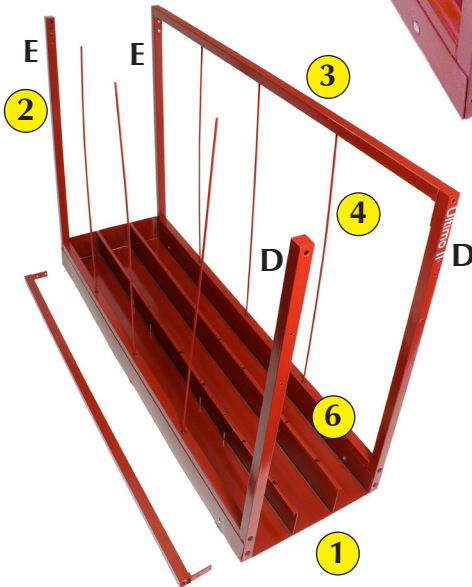

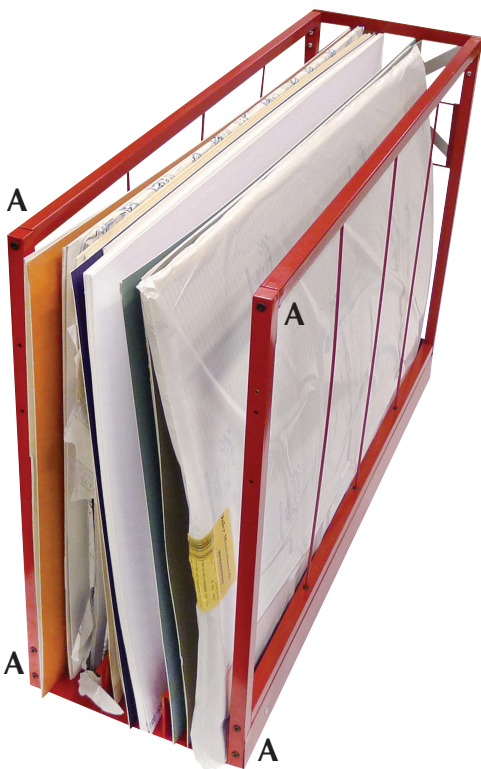

E posts can be identified by the extra pair of holes app. 1/3 down.

The ends of rods, 4, and hoops, 6, sometimes have a small accumulation of hardened paint. Scrape or sand this off to make insertion easier.

Ultimo II is designed to take up to 180 sheets of 1.4mm matboard. It is not suitable for heavy materials like glass.

D and E posts each have two small holes near the top. These should point inwards when assembled.
