

CWH Square Sawtooth Hangers

PUB036
V.4 04/2018

The smart way to hang pictures and mirrors, quickly and safely

1 Fix CWH Hangers to frame

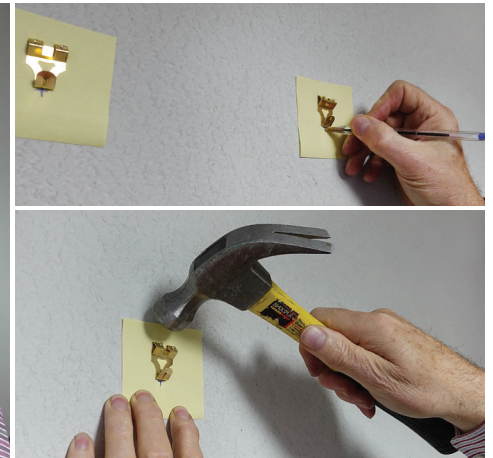

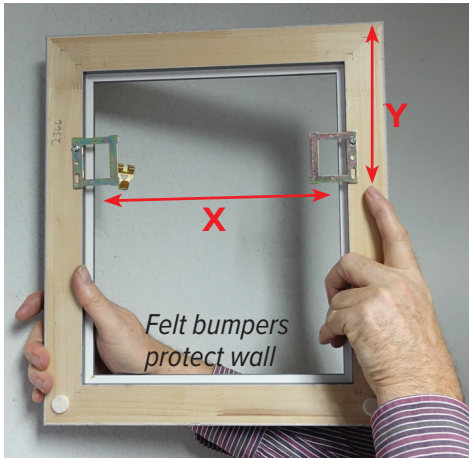

Position and mark approx. 1/3 down from the top. Put one screw in an oval hole of each.

Two CWH Hangers on a frame take up to 15kg / 30lb.

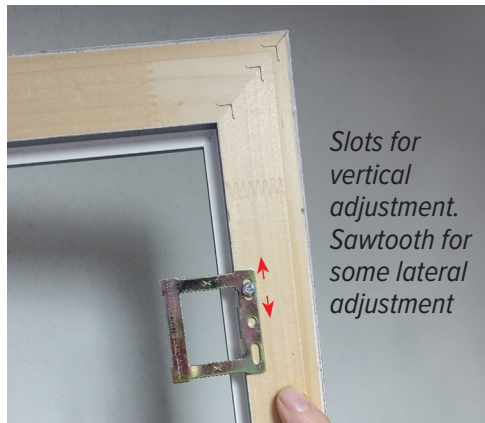

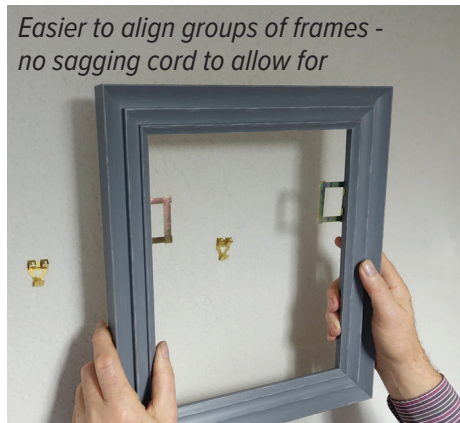

2 Position and fix the wall hooks

Using distance X, between the X's as a guide, place two Post-its in approximate hook positions. Top of frame will be distance Y above hook. Check and mark hook positions on Post-its. Hold hook in position on mark. Use a light hammer to insert pins.

3 Trial hang the frame

Hang frame on the hooks. Check for general position. To adjust for level, use screw in a slot. To lock CWH Hangers in position, insert second screw in each.

CWH3
For most aluminium frame profiles

Tips into the channel of most double-plate aluminium frame profiles after assembly.
